Jennifer Roberts is president of Elements Engineering, a civil engineering design firm focused on sustainable solutions for site development. Jennifer has over 20 years of experience in the civil engineering field and started her company in 2002 to provide an alternative approach to traditional site design.

Jennifer enjoys the creative design process and works closely with architects, urban planners, landscape architects, developers and property owners to create places where people and nature thrive.

Jennifer is an advocate for conservation, primarily due to her exposure to nature as a child growing up in Southern Indiana. For a short time, Jennifer lived in Seattle, WA in order to gain firsthand knowledge of the design & implementation of green infrastructure features. Since then, Jennifer has designed many green infrastructure projects in Indiana and has helped to educate her clients on the benefits of designing with nature.

Preferring variety, Jennifer has worked on several public and private sector projects ranging from university drainage/masterplan projects, neighborhood revitalization & streetscapes, public combined sewer separation projects using green infrastructure, parks, commercial sites, affordable housing and multi-family housing. Some examples are listed below:

- Finch Creek Park (a new 200-acre nature and sports park) – Noblesville, IN
- Overlook @ the Fairgrounds Apartments – Indianapolis, IN
- Purdue Sustainable Stormwater Improvements at Stadium Parking Lot – West Lafayette, IN
- St. Clair Place Urban Neighborhood Revitalization & Green Alleys – Indianapolis, IN
- CSO 143 Green Infrastructure features – Indianapolis, IN
- Irvington Community School Teaching Rain Garden – Indianapolis, IN
- Indianapolis Museum of Art: Art + Nature Park Parking Lot at 38th Street Loop – Indianapolis, IN
- The Nature Conservancy of Indiana Headquarters (LEED NC project) – Indianapolis, IN
- Keep Indianapolis Beautiful Headquarters (LEED NC Gold certified project) – Indianapolis, IN
- Green Infrastructure Fact Sheets & Typical Green Infrastructure Details for City of Indianapolis, IN
- Angola Downtown Revitalization Project – Angola, IN

Jennifer is a member of several professional organizations related to water and nature conservation. She was a steering committee member for Indy Rezone and currently is on the Sustain Noblesville board. ELEMENTS Engineering is a WBE certified company in the City of Indianapolis and State of Indiana.
